

Mid-Terms Briefing 2024

1. The scope of the mid-terms will be **all content covered from Week 1 to Week 6**.
 - a. Java language, Classes, abstract classes, interfaces, exceptions, OOP principles, design patterns: strategy, observer, singleton, recursion
2. The mid-terms will have programming and conceptual questions
 - a. 40% - 60% programming questions
 - ➔ Launch Schoolyear from eDimension to access Vocareum
 - ➔ submit your answer to Vocareum
 - ➔ Vocareum merely accepts your submission
 - ➔ will not tell you how many test cases passed/fail
 - b. 40% - 60% conceptual questions
 - ➔ write your answer on the test paper
 - c. Number of questions yet to be determined, depends on what the examiners end up writing.
3. You are allowed your laptop and any number of **paper-based** materials. No other electronic devices will be allowed e.g. tablet, no calculator etc etc.
4. What you should do before the test

Be present at the venue 30 minutes before the start time and launch Schoolyear on your laptop. If you encounter difficulties, this gives us time for contingency measures such as sending you to DS Lab or to get you another laptop.
5. Please look out for the sample invigilation slides on eDimension and read it to know the test protocol.
6. We have contingency plans for various situations – please don't worry but do keep instructors informed of any situation you are facing regarding the test.
7. Please also read the course handout for information on the Mid-Terms.
